

Master of Science Program in Epidemiology (International Program)

The Master of Science Program in Epidemiology (International Program) emphasizes harmony between theory and practice in both academic teaching and research, enabling students to have a strong foundation in research and critical thinking in public health and epidemiology. Students take coursework together with doctoral students during their first year and conduct master-level thesis research in the second year. This process connects the science of the profession with other disciplines, enabling students to fully understand the sciences of global health in terms of magnitude and determinants of health problems and the solution to improve population health for good health and well-being. The Program lays a foundation for those with an undergraduate background in health science or work experience in health care and service to enter the world of research and to become fully capable of conducting preliminary studies. Graduates will be able to use their training to solve population health issues and become inspired to undertake further studies and research in the future. Graduates also will have gained experience in research methodology and earned publications to enable successful pursuit of higher studies in related programs at leading universities. Our Program's alumni have found employment in the public sector, universities, and the private sector as research assistants, researchers, statisticians, data managers, data analysts, data quality controllers, and clinical research coordinators.

1 . Number of students limited	6 students	
2. Plan of study	Plan 1 Academic (A2)	
3. Instruction Administration	Monday - Friday	
4. Format of Instruction	Onsite	
5. Tuition fee	Thai student 45,000 baht/semester Foreigner students 90,000 baht/semester or 6,000 USD/Year	
6. Course Structure	Course Structure	Plan of study
		Plan 1 Academic (A2)
	Credit	18
	Audit (no more than.....)	-
	Thesis	18
	Minor Thesis	-
	Total	36
7. Qualification of applicants	1. Bachelor's degree in health professions such as medicine, public health, nursing or other related fields. At least one year of work experience in health services preferred.	

	<p>2. Fair to good command of English to carry out study, research and publication.</p> <p>3. Aged ≤ 40 years in June at enrollment year</p> <p>4. Other qualification under the program committees' consideration</p>
8. Application documents required by program	<p>1. Application form</p> <p>2. CV</p> <p>3. Medical certificate (English version)</p> <p>4. Statement of purpose (approximately 400-500 words)</p> <p>5. Research plan (in brief)</p> <p>6. First page of all published articles (if any)</p> <p>7. English score (such as IELTS =5.0, TOEFL=500) if any</p> <p>8. Recommendation letter from your workplace/ boss 1 copy</p> <p>9. Transcript and certificate</p> <p>10. passport</p>
9. Contact info	<p>Professor Tippawan Liabsuetrakul E-mail address: tippawa@yahoo.com</p> <p>Ms.Anyawadee Limwachirachot E-mail address: bags.anyawadee@gmail.com</p> <p>Website: https://medipe2.psu.ac.th/2019/</p> <p>Facebook: https://www.facebook.com/medipe</p>

Test schedule

Subject	Date	Venue
Paper examination 1. Public Health 2. Statistics 3. English	28 February 2024 09.00-12.00	The meeting room 1, The Department of Epidemiology, Faculty of Medicine
Interview	28 February 2024 13.00-14.30	The meeting room 1, The Department of Epidemiology, Faculty of Medicine
